Hello teacher.Today I'm glad to be here to give a speech about my fresh experience in University.

First I want to say is that the campus life is really different from what I have experience in high school . For instance I uesd to waked up through my mother But now I have to set serveral clock to make myself could heard them in the morning .And the college life is more colorful than I imagined，the subject studied are also more difficult and you need more automomy .Now my plan is to pass CET-4 and CET-6 in the future, and strive to fail.

Thanks for the teacher's teaching in high school, and I will work harder in the future
